Legend

Route / page component

Layout or guard (dashed)

Arrow: verb [mechanism], points to where the visitor is sent

Citations (as built)
Route table, catch-all behind RequireAuth: web/src/app/AppRoutes.tsx:L12-L49 (REQ-NAV-001 AC-1, AC-3, AC-8).
RequireAuth: nothing while unknown, Retry alert when the probe fails (L24, L9-L18), nothing after an explicit log out because the provider navigates to /login without returnTo (L26), otherwise replace to /login?returnTo= with the session-ended message state: web/src/auth/RequireAuth.tsx:L21-L37 (REQ-AUTH-004 AC-2, AC-4).
PublicRoute: Retry alert on probe failure, signed-in visitor sent on, /login via safeReturnTo: web/src/auth/RequireAuth.tsx:L40-L48.
TodoListPage (filter, search, pagination, mark done, delete, clear completed; REQ-LIST-001..003, REQ-TODO-005..007): web/src/todos/TodoListPage.tsx:L31-L34, L355-L373.
TodoDetailPage (bad id gives the to-do not-found message, no API call): web/src/todos/TodoDetailPage.tsx:L34-L37, L85-L91. NotFoundPage: web/src/app/NotFoundPage.tsx:L1-L30.
AppShell skip link, Log out control and polite live region: web/src/app/AppShell.tsx:L45-L72 (REQ-AUTH-004 AC-3, NFR-001).
