Table

Owning module (dashed)

Arrow: relationship [constraint], from the table holding the foreign key to the table it references

Citations (as built)
Table and index definitions: api/src/main/resources/db/migration/V1__init.sql:L6-L39 (users L6-L12, sessions L14-L21, todos L23-L39).
todos.user_id to users is the only foreign key between two modules' tables: V1__init.sql:L26; the to-dos module takes userId only from CurrentUser: api/src/main/java/app/todo/todo/TodoController.java:L34-L74.
Every todos statement is filtered by owner: api/src/main/java/app/todo/todo/TodoRepository.java:L7-L10, L13-L31.
Token stored as SHA-256 hex only: api/src/main/java/app/todo/auth/SessionService.java:L16-L19, L35-L43.
Argon2id password hash and no role column are stated in docs/specs/CHG-0001/sdd.md:L113-L123 (hasher class not read for this diagram).
File location and SQLite pragmas: api/src/main/java/app/todo/config/DatabaseConfig.java:L22-L39.
