Legend
Light blue box: component · Mid blue box: container · Cylinder: datastore · Dashed box: module package, shared kernel or composition root · Arrow: call or dependency, labelled with verb and mechanism.
Allowed dependencies, enforced by ArchUnit (NFR-007 AC-2, ADR-0018): todo uses todo, common, auth.api; auth uses auth, common; common uses no module and not config; config and the root package use any. Repositories are package-private.
Edges between the filters (next filter, then header check, routes) show runtime order, wired in config, not code dependencies. One DataSource, owned by config (NFR-007 AC-1). ApiException subtypes and the test-only classes are not drawn (sdd §2).
